³ Although Utah Code Ann. § 80-2-301(2)(b)(ix), (x) (Division Responsibilities) broadly requires the Division of Child and Family Services to provide training for staff and providers involved in the delivery of offered services, training on identification and response to child sex trafficking is not expressly mandated as part of that training requirement. However, trafficking-specific training may be included since the mandate is specific to service providers, presumably on service responses, and the Division offers specialized services to commercially sexually exploited children.
